DISCLAIMER

This guidebook can not replace outdoor experience, a book on kayak safety, or a professional kayaking course. Rather, it is designed to provide basic information to help paddlers plan their trip to the Broken Group Islands and to develop an awareness of the cultural and natural heritage of the islands.

Please note that travelling on the ocean or among the islands of Barkley Sound is inherently dangerous. You may encounter challenging navigation or weather conditions, unexpected vessel traffic, poor visibility, rugged terrain and wild animals. Use extreme caution when travelling in Barkley Sound waters. Paddling conditions may suddenly deteriorate due to weather and other factors. Sheltered waters may rapidly intensify into areas of extreme hazard.

Pacific Rim Informative Adventures Ltd. and Jean-François Marleau assume no liability for any accidents, damage, injuries or death that may be sustained by anyone using the information provided in this book. Pacific Rim Informative Adventures Ltd. and Jean-François Marleau do not warrant that the waters of Barkley Sound are safe or that the information in this book is completely accurate. Therefore, please be careful when using this or any other source to plan and carry out your outdoor recreation activity. Paddlers travel at their own risk.

Respect the power of the ocean surf. Photo: Barbara Schramm
